

C CODE EVALUATION & SOLUTION SHEET (UPDATED)

Q.NO.	LINE	ERROR SNIPPET	CORRECTION	EXPLANATION
1	21	<code>averageSales = totalSales / 5;</code>	<code>averageSales = (float)totalSales / 5;</code>	Integer division loses decimal precision.
2	23	<code>printf("...%d\n", averageSales);</code>	<code>printf("...%f\n", averageSales);</code>	Using incorrect format specifier for float.
3	31	<code>if(sales[i] < highestSale)</code>	<code>if(sales[i] > highestSale)</code>	Incorrect comparison operator for finding maximum.
4	49	<code>monthlySales[5] = 250;</code>	Remove line, or increase array size.	Array index exceeds its declared size.
5	53	<code>for(int i=0;i<=5;i++)</code>	<code>for(int i=0;i<5;i++)</code>	Loop iterates beyond valid array boundaries.
6	62	<code>strcpy(product, "LaptopComputer");</code>	<code>char product[15];</code> (on Line 60)	String length exceeds character array size.
7	70	<code>category = "Electronics";</code>	<code>strcpy(category, "Electronics");</code>	Cannot directly assign string to array.
8	78	<code>stock["first"] = 100;</code>	<code>stock[0] = 100;</code>	Arrays require integer index values.
9	80	<code>stock[2.7] = 200;</code>	<code>stock[1] = 200;</code>	Arrays require integer index values.
10	101	<code>scanf("%d", orders[i]);</code>	<code>scanf("%d", &orders[i]);</code>	scanf requires memory address pointer.
11	117	<code>if(revenue[2] = 3000)</code>	<code>if(revenue[2] == 3000)</code>	Using assignment operator in conditional statement.
12	126	<code>backupRevenue = revenue;</code>	Loop through, or use <code>memcpy()</code> .	Cannot directly assign arrays in C.
13	134	<code>printf("%d\n", commission[0]);</code>	<code>printf("%f\n", commission[0]);</code>	Using incorrect format specifier for float.

Q.NO.	LINE	ERROR SNIPPET	CORRECTION	EXPLANATION
14	140	<code>city = "Jaipur";</code>	<code>strcpy(city, "Jaipur");</code>	Cannot directly assign string to array.
15	151	<code>printf("%s\n", branch);</code>	Add <code>branch[4] = '\0';</code> before printing.	Character arrays require null-termination for strings.
16	157	<code>for(int i=0;i<=5;i++)</code>	<code>for(int i=0;i<5;i++)</code>	Loop iterates beyond valid array boundaries.
17	171	<code>strcpy(department, "Marketing");</code>	<code>char department[10];</code> (on Line 169)	String length exceeds character array size.
18	179	<code>expenses = sales;</code>	Loop through, or use <code>memcpy()</code> .	Cannot directly assign arrays in C.
19	187	<code>ratings[-1] = 5;</code>	<code>ratings[0] = 5;</code>	Array index cannot be a negative number.
20	189	<code>printf("%d\n", ratings[0]);</code>	Init array: <code>int ratings[5] = {0};</code>	Printing uninitialized variable outputs garbage.
21	201	<code>printf("%s\n", feedback[0]);</code>	<code>printf("%d\n", feedback[0]);</code>	Using incorrect format specifier for integer.
22	205	<code>printf("...Successfully\n")</code>	<code>printf("...Successfully\n");</code>	Missing required semicolon statement terminator.
